New Orleans, La.. August 8—Cotton—Spot cotton steady, 5c. up. Sales on the spot \$50 bales. Cotton futures opened steady at an advance of 19826 points on good cables and a continued lack of rain in Texas. Both longs and shorts bought heavily in the first hour. Telegrams came from points in Texas stating that the crop situation was critical, and that without rains something approaching a fallure would be experienced. The more active new crop months advanced until they were 22,627 points over Saturday's closing. The market was very steady throughout the morning session. The forecast promised continued fair weather in the Western half of the cotton belt, and this increased the tendency to buy, and during the larger part of the time offerings from profit-taking longs were hardly sufficient to supply the demand. The highest of the morning prices were 25627 points over Saturday's closing. At noon there was reaction of 557 points as the result of wholesale profit-taking. A feature of the morning was the receipt of the first bale of this new Louisiana crop which was sold at auction for 17c. a pound. In the afternoon session the market was very steady. At 2 o'clock the new crop months were at new high levels for the day, 27,835 points up. The close was steady at a net advance of 29,624 points. Cotton futures closed steady. Closing bide: August, 15.27; September, 14.22; October, 12.85; May, 12.85.

CHICAGO GRAIN MARKET.

Chicago, August 8.—Expecting a bearish report from the United States government the wheat trade to-day discounted prices. Values also felt the depressing influences of the big movement of the new crop. The close was easy at a decline of a shade to be undered with Saturday night. The session advanced corn 16 The., and lowered oats 1-16 The. Coverisons were irregular, finishing 174c, down to 74c, up.

The leading futures ranged as follows: Open, High, Low. Close. rk Cotton Exchange
